3. Restatement Note

Q1 2026 revenue has been restated from the previously reported KWD 1,671,000 to KWD 1,655,000. The KWD 16,000 difference relates to pass-through software licence reimbursements that were reclassified from revenue to a reduction of technology expense. Q1 2026 net operating income is unchanged by the restatement.

4. Headcount

AlPrime Capital employed 42 full-time staff at June 30, 2026: 31 client-facing analysts and CPAs, 6 technology and data staff, and 5 administration and compliance staff.

5. Outlook & Targets (Forward-Looking, Not Actual Results)

Management has set a Q4 2026 revenue target of KWD 1,950,000. Full-year 2026 revenue guidance is KWD 7,100,000 to KWD 7,250,000. These are internal targets only and are not reported results.

Key risks to the outlook: delays in client ERP migrations, senior CPA hiring lead times of 10 to 14 weeks, and concentration risk, as the ten largest retainers represent 31% of Q2 2026 revenue.
